Re: French Toast Label Changes

Michael Foods, Inc. is in the process of eliminating the trans fat from the glazes that are applied to CN French Toast products. We will be applying a bright starburst label on the end panel of the master case that identifies the item is now "trans fat free". There will be no changes to the functionality of the product.

At the same time, we are updating our French Toast labels in accordance with the FDA labeling laws. We are required to declare the ingredients involving allergenic ingredients in all French toast and bread products.

An example of the ingredient changes on the label is:

Old Statement: whole wheat flour, water, high fructose corn syrup, yeast, wheat gluten, contains less than 2% of the following: soybean oil, salt, what protein isolate (wheat gluten, lactic acid, sulfite), sodium stearoyl lactylate, calcium propionate (preservative), Ascorbic acid (added as a dough conditioner, microcrystalline cellulose, corn starch

New Statement: BREAD: WHOLE WHEAT FLOUR, WATER, HIGH FRUCTOSE CORN SYRUP, YEAST, WHEAT GLUTEN, CONTAINS LESS THAN 2% OF THE FOLLOWING: SOYBEAN OIL, SALT, WHEAT PROTEIN ISOLATE (WHEAT GLUTEN, LACTIC ACID, SULFITE), CALCIUM PROPIONATE (PRESERVATIVE), CORN STARCH, CONTAINS ONE OR MORE OF THE FOLLOWING DOUGH CONDITIONERS: MONOGLYCERIDES, DIGLYCERIDES, SODIUM STEAROYL LACTYLATE, AZODICARBONAMIDE, ASCORBIC ACID, ENZYMES

We have submitted the changes for the CN approval but until we receive the approval for the new changes, we have removed the CN box from the master case labels. We will add the CN boxes back onto the labels after we have received approval.

The USDA-Food and Nutrition Service Department has changed their calculation for the bread equivalency and we will be reducing the bread equivalency. These changes will be made on the labels once we have received approval from CN. The French Toast items will still meet the minimum requirements of at least 1.0 bread credit and 1 meat alternate for breakfast in accordance to the meal guidelines
